

CGC- Vishwaniketan Network

Announces

IPR / Product Development focused 'Ph.D.' Programme

CGC – Vishwaniketan Network, a global Research & Development centre and academic arm of GISFI have mandate to create Product/Technology development engineers who will conduct patent-based research to evolve Indian Technology for local and global requirements. These engineers will in future, create start-up companies to create employment instead of being employed. The objective also is to transform Indian Engineering education from theoretical approach to Project Based Learning (PBL).

I4ET is an initiative of the network to create research institution and incubation for Indian start-ups at Vishwaniketan Campus, on Mumbai-Pune Expressway, near Navi Mumbai.

The best talent in India is invited to enrol for PhD Programme and Undergraduate Fellowships (Students from Indian Engineering Colleges) with Universities in collaboration abroad to achieve the above objectives.

❖ Silent Features:

1. 85% Scholarships to deserving candidates from Academia, industry.
2. UG Fellowships and PhD. Programme in ICT, Computer Science, Mechanical, Electrical, Civil, Energy, Environment Engineering, etc. Preference to research interests in 5G.
3. Global exposure, international standards, flexible work schedules/ European Credit Transfer System.
4. Admissions as per rigorous selection process of the host universities abroad.
5. Strong network with R&D centres, Universities abroad, 70 teachers/ professionals from Engg. Colleges and corporates were awarded PhD.
